

## Roaming

### Our service

Monzoon Networks operates a neutral roaming platform. People connecting to a Monzoon hotspot can choose from a multitude of roaming partners (e.g. iPass, WeRoam, Boingo, Trustive, etc.). ISPs benefit from our existing roaming agreements and accounting practices. Reach out to all kinds of partners via the Monzoon platform - and get everything from a single source!

### Features

- ■ ■ Freely selectable individual partners
- ■ ■ UAM for direct authentication via a landing page
- ■ ■ WISPr capability for software clients
- ■ ■ Accounting data supplied by Monzoon
- ■ ■ Integration and design support from Monzoon
