SwissVPN

Our service

Safe surfing in your local neighbourhood

The problem

Maybe you know that surfing, mailing and chatting can easily be intercepted especially in your local neighbourhood.

Tracking down your traffic in hotel networks, hotspots, corporate and home LAN, regional and national networks is easy in many cases.

Our solution

Encrypted VPN tunnel from your computer to a Swiss computer centre in Zurich and entering the Internet from there. This way your traffic will safely tunnel all wireless and wired networks using encrypted VPN and you'll surf the Internet from Switzerland.

For technical experts

- ▪▪▪ PPTP tunnel (integrated in todays Microsoft Windows ®, Apple Mac OS X ® or Linux ® operating systems

- ▪▪▪ 128-bit MPPE encryption, authentication protocol is MS-CHAPv2

- ▪▪▪ Swiss Public IP Address, no NAT, no filtering, fully transparent

- ▪▪▪ Backend connection 2 * 300 Mbit/s, fully redundant
